Web portal Boletus informaticus

A public information system for the recording and mapping of fungi in Slovenia.

Boletus informaticus is a public information system for the recording and mapping of fungi in Slovenia. It consists of a central database of fungi in Slovenia, a web, mobile and desktop application, and a Mycotheca and Herbarium of Slovenian Forestry Institute. The information system Boletus informaticus is the result of cooperation between Slovenian Forestry Institute, Mycological Association of Slovenia, and Institute for systematics of higher fungi.

MORE DETAILS

CHALLENGE ADDRESSED

7.- Raise public awareness, social acceptance and political support for forestry

DOMAIN

Forest disturbances, risks

TYPE OF SOLUTION

Data platforms, data hubs
