OPTIM’Indus

The objective of the OPTIM'indus action is to provide tailored support to develop the performance and competitiveness of companies by providing keys to meet the challenges facing the industry. It is financed by Europe, the Fund for Innovation in Industry, the New Aquitaine region and the OPCAIM (Joint Organisation for the Authorised Collection of Metallurgy Industries).

3 development axes are proposed to companies:

1) Project support

2) Skills development

3) Development of professional networks

The support of the company's projects is divided into several stages:

- expertise in skills and vocational training needs and an industrial diagnosis to define new technical orientations,
- assistance in improving processes, tools and product development, for example by carrying out a feasibility study or by putting partners, consultants or experts in contact with each other.
- proposal for financial assistance

OPTIM'indus offers Master Classes, training days or courses for executives, managers or technicians to develop skills.

It runs "Industry of the Future" clubs where companies meet and exchange ideas.
