Information portals and tools for private forest owners

On the state and cluster level there have been established different portals for private forest owners, to show them the opportunity to contact the local foresters and inform themselves about forest management and all questions to do with forest ownership.
The portals are an approach to reach out to forest owners without professional expertise and any relations to forestry by offering them an easily accessible channel for information.

It is important not just to show the addresses of your personal available state forester and forest owner association but also to include entrepreneurs and other actors in the forest business.

Forest owner portals are an innovative and effective way especially to address the “new forest owners”.
