

Increasing transparency in wood trade

Rustechworld

Rustechworld is an operational platform that integrates different tools aiming at sustainable forest management. It facilitates the organization at management unit level of operational data along with climate, vegetation, biodiversity, forest production and soil information in georeferenced layers displayed in map or tabular form. It contains the Rustechwood tool that allows fulfilling the requirements of Due Diligence Systems (EUTR) by improving the transparency of forest products trade and the Rustech measurement tool, a field-located multi-sensor box developed to provide real time data for decision making (under development).

MÁS DETALLES

RETO ABORDADO

6. Hacer crecer la bioeconomía forestal mediante el uso circular y los productos de valor añadido

DOMINIO

Productos, mercados, comercio
