

# SISREP | Management and analysis of reforestations on agricultural land

*SISREP is a project that has developed an advanced statistical model that allows predictive and descriptive analyses to be carried out using a forestation survival prediction tool to ensure the success of new plantations. SISREP is based on the use of knowledge from historical in-situ visits to predict the probability of success of future plantations using machine learning techniques, and on a database with more than 50,000 observations referring to forestations carried out from 1993 to the present day.*

The main objective of SISREP is to make use of the information obtained during inspections in the framework of aid for afforestation and the creation of forest areas in Castilla y León in order to:

- Use of the information obtained in the field for the management of the controlled files.
- Creation of a centralised and geo-referenced database with information on the state of plantations.
- To be able to predict, by means of artificial intelligence techniques, the success of future plantations.
- With the knowledge extracted, review and improve the planning of future actions, allowing the implementation of the most appropriate technical conditions for the new environmental circumstances.

To this end, an infrastructure has been designed and implemented that allows the digitalisation of the entire workflow, from data collection in the field to the use of these data in advanced statistical analysis tools.

The data collected in the field are for example species, altitude, density, slope, method, orientation, age, lithography, with or without sowing, or area.

## DETALLES

---

### ORIGEN DE LA MADERA

Bosque

### TIPO DE MADERA

Madera en rollo

### POTENCIAL DE MOVILIZACIÓN

--

### POTENCIAL DE SOSTENIBILIDAD - VALOR

Muy positivo

### TIPO DE MADERA AFECTADA

Reforestation and creation of forest areas

### FACILIDAD DE APLICACIÓN

--

### IMPACTO EN EL MEDIO AMBIENTE Y LA BIODIVERSIDAD

SISREP enables better forest management and ensures the success of new tree plantations, thus improving the preservation of the environment and the creation of new forest ecosystems.

### FACILIDAD DE IMPLEMENTACIÓN - EVALUACIÓN

--

Therefore, the project has a very positive impact on the environment and biodiversity.

### EFECTO SOBRE LOS INGRESOS

Very positive. Better forest management can generate more income.

### PREREQUISITOS CLAVE

In order to carry out this project, it would be necessary to have a solid database, compiled over a number of years.

### POTENCIAL DE EXPLOTACIÓN

Very positive, as SISREP is a support system for forest management in multiple variants, as well as a valuable aid to both private owners and managers in the task of creating new forests and, in the medium term, managing specific aspects of existing ones.

### TIPO DE EVENTO EN EL QUE SE HA PRESENTADO ESTA IFS

--

The use of data derived from the daily management of administrations is a

highly valuable source of information that can help to improve the services offered by these administrations. To this end, the digitisation of processes becomes a fundamental and indispensable task.

**HUB**

Centro del Suroeste

**IMPACTO ECONÓMICO**

--

**CONOCIMIENTOS ESPECÍFICOS NECESARIOS**

Use of digital tools.

**EFFECTO SOBRE EL EMPLEO**

--

**COSTES DE IMPLEMENTACIÓN (EURO - €)**

--

## MÁS DETALLES

---

### RETO ABORDADO

1. Mejorar la resistencia y la adaptación de los bosques al cambio climático

### DOMINIO

Inventario, evaluación, seguimiento  
Gestión forestal, silvicultura, servicios ecosistémicos, resiliencia  
Perturbaciones forestales, riesgos, respuesta a desastres

### TIPO DE SOLUCIÓN

Modelización, DSS, simulación, optimización

### PALABRAS CLAVE

Reforestation  
database  
forecasting

### SOLUCIÓN DIGITAL

Sí

### INNOVACIÓN

Si

### PAÍS DE ORIGEN

España

### ESCALA DE APLICACIÓN

Regional/sub-nacional

### AÑO DE INICIO Y FIN

--

## DATOS DE CONTACTO

---

### PROPIETARIO O AUTOR

CESEFOR, Junta de Castilla y León
