Full forest management service for forest owners

Demand for forestry-service products is increasing. This means the service providers must be easy to reach and be able to offer all services needed by forest owner. Providers have to take into account the diverse forest owners groups and their needs regarding the management and use of forests.
So far, the challenge have been scattered services for forest owners.
Now many companies and entrepreneurs have started to offer full forest management services from one place.

Full service from one company/association is attracting forest owners to take care of their forests.
The change of the business environment aims at better competitiveness and cost-efficiency in forest management.

Network of associations offering full service of forest management for forest owners: guidance, planning, call for bids, comparing offers, harvesting, forest regeneration, digital services and forest estate
brokerage.
