

KomSilva | Communication assistance and public relations in forestry

der KomSilva-Leitfaden

In KomSilva, tools for a goal-oriented and efficient discourse with forest owners are being developed. Target groups are stakeholders and organizations who activate and address forest owners. Mostly forestry associations should profit from the project, but also service providers and other stakeholders. Communication with forest owners is a key asset towards mobilization. Existing instruments are being adjusted and new tools like online-training, online-consulting concepts and social media strategies for consulting and communication are being created and already successfully tested.

Existing instruments for approaching forest owners and communicate with them are being investigated and evaluated according to their effectiveness. Thereby, a collaborative approach is being pursued. It comprises an advisory committee with experts from practice and an active involvement via interviews, a large-scale online-survey and workshops. Experiences in activating forest owners and in public relations are being collected and practicable factors of success are being identified. Arguments for the activation of forest owners are being developed to sensitize forestry associations also for the new task fields.
