

## Drones in the Service of Forestry

*Single tree detection software uses drone data as the basis for estimating important tree parameters (tree position, height and diameter). Drones offer very precise terrain and inventory data and are very cost-effective.*

Drone images are commonly used today as optical support in the forestry sector. The Potential of drone data and parameters that can be generated from single tree detection software is far from exhausted. The innovative and creative aspect of the project is to create a digital twin of the forest. This twin provides all important tree parameters for the researchers to model the forest, make estimations of interventions, plan and make predictions.

## VIŠE DETALJA

---

### IZAZOV

5. Unaprjeđenje učinkovitosti lanca opskrbe šumom na gospodarstvo i okoliš

### DOMENA

Popis, procjena, praćenje  
Upravljanje šumama, uzgoj šuma, usluge  
ekosustava, otpornost  
Istraživanje i razvoj

### VRSTA RJEŠENJA

Senzori, mjerna oprema

### KLJUČNE RIJEČI

Drones; Inventory; Management

### DIGITALNO RJEŠENJE

Da

### INOVACIJA

Da

### ZEMLJA PODRIJETLA

Švicarska

### PODRUČJE PRIMJENE

Nacionalna

### POČETAK I KRAJ GODINE

--

## KONTAKT PODATCI
