Fonds forestier en Limousin (Forest Fund in Limousin)

The Forest Funds en Limousin is a regional structure that acts as an interface between forest owners and financial contributors. It manages financial flows and handles requests from forest owners requesting assistance. This private initiative was initiated by Fransylva in Limousin (Limousin forest owners' syndicate).

By the end of 2017: 180 hectares of plantation have been validated by the Forest Fund in Limousin and 90 hectares are still under study.

In return for their financial investments through the Forest Fund in Limousin, companies and local authorities are awarded the "I love the Limousin forest, I support it" label, enabling them to communicate to their clients or employees about their interest in preserving the environment and fighting climate change. The sums paid by companies are tax deductible because the share is considered sponsorship. The forestry works eligible for aid are plantations or forest improvements. The minimum surface area of the forest sites must be 1 ha.
