

WBV Logistics: Optimization of the timber harvest chains and mobilization in private forests – regions Holzkirchen, Rosenheim and Traunstein

Goal of the project was to improve the flow of information and of material in the timber supply process of the forestry associations (WBVs) Traunstein, Rosenheim and Holzkirchen. The following objectives were defined: Creation of an integrative model to increase the competitiveness of all stakeholders in the value-added chain (forest owner, WBVs, contractors, haulers, consumers of wood) Evaluation of different timber harvest chains in the frame of an actual state analysis based on important logistic indicators (i.a. lead times, accounting periods) Recording of organizational structures and of the technical equipment of the WBVs for the identification of the business process flow The study showed that especially in small private forests a clear process coordination is needed to fulfill customer demands while at the same time reducing idle time à consequent use of modern information and communication technology is very essential. In the implementation phase, changes were measured in two models: regional thinning events and the integration model. In the regional thinning events the following changes were recognized: The goal of a timber stack size of 50 m³ obs could not be reached, in fact, it even decreased to a size below the size of the actual state analysis The share of highly mechanized harvesting methods in total logging increased from 28 % to 37 % (goal: 35 %) The lead time could be reduced from 49 to 38 days (goal: 35 days) The accounting time (end of transport until final billing) could be reduced from 39 to 25 days (goal: 30 days) due to the installation of 4 EDP-interfaces with customers (goal: 5 interfaces)

DETALHES

ORIGEM DA MADEIRA

Floresta

TIPO DE MADEIRA

Tronco

TIPO DE MADEIRA EM CAUSA

Stemwood

IMPACTE NO AMBIENTE E BIODIVERSIDADE

Positive on biodiversity and forest resilience enhancement

IMPACTE NAS RECEITAS

more efficient working processes and cost reduction possibility identification

POTENCIAL DE EXPLORAÇÃO

--

HUB

--

IMPACTE ECONOMICO

more efficient working processes

CONHECIMENTOS ESPECIFICOS NECESSÁRIOS

Staff have to be trained with IT-tools

POTENCIAL DE MOBILIZAÇÃO

Estimated 1 m³/ha through more efficient staff at forest owner association

SUSTENTABILIDADE POTENCIAL - VALOR

--

FACILIDADE DE IMPLEMENTAÇÃO

Medium

FACILIDADE DE IMPLEMENTAÇÃO

--

PRE-REQUISITOS CHAVE

Using standard IT solutions and adopt existing organization to usage

TIPO DE EVENTO EM QUE ESTE BPI TEM SIDO APRESENTADO

--

IMPACTE NO EMPREGO

Better qualified staff through project including results

CUSTOS DE IMPLEMENTAÇÃO (EURO - EUR)

--

MAIS DETALHES

DESAFIO ABORDADO

--

PALAVRAS-CHAVE

--

PAÍS DE ORIGEM

Alemanha

DOMÍNIO

Cortes, infraestruturas e logística

SOLUÇÃO DIGITAL

Não

ESCALA DE APLICAÇÃO

Regional/ sub-nacional

TIPO DE SOLUÇÃO

--

INOVAÇÃO

Não

ANO DE INÍCIO E FIM

2003 - 2005
