

Firewood for all Ukrainians

"Firewood for all Ukrainians" is a state-owned online store where people can buy firewood in few clicks and have it delivered to their homes. Foresters accept online orders from Ukrainians. This service makes it easier and more convenient to buy firewood in the country.

The online store sells firewood to the population of Ukraine. Every citizen has the opportunity to order and purchase 15 cubic meters of firewood per year using a simple and easy-to-understand system in a few clicks.

To place an order, one needs to log in with ID.GOV.UA, enter the system, and specify the delivery address. Next, the system will offer the nearest firewood suppliers to the buyer, from the list of which one has to choose the potential supplier, species of firewood out of the list available for purchase, and the required volume.

Upon receipt of the order, the supplier contacts the buyer to clarify the details, including the type of firewood (chopped/roundwood) and the need to deliver the firewood to the buyers' location. After agreeing on the order, the seller and the buyer conclude a public offer agreement for the order, sale, and delivery of firewood. After this the online payment function for the order in the personal account becomes available.

To get the firewood on site, the buyer must present identification documents and the individual tax number of the person who placed the order.
