

## WCM

*Info platform with decision supporting tools.*

Forestry as one of the economic sectors incorporates several links in the complex forestry wood chain. From the technological point of view, the forestry links of the FWC are formed by a series of production processes, with which natural forest resources are converted into products and services. In the selection of separate machines and connection of individual links into series of production chains, the question of costs is certainly an important issue. Material costs of individual machines and the mandatory or optional accessories or attachments are key to the optimization of individual series of production processes. The application enables a simple selection of a technological model for the production of roundwood as well as green chips. With the selection of machines and their mandatory or optional accessories or attachments along the entire chain from the felling area to the final user, the costs are stipulated as well.

Visualization of technological components along the forestry wood chains and presentation of costs enable optimization and easier understanding of otherwise very complex chains.

## VIAC INFORMÁCIÍ

---

### RIEŠENÁ VÝZVA

3. Aktivizácia súkromných vlastníkov a družstevného obhospodarovania lesov  
ťažba, infraštruktúra, logistika

### TYP RIEŠENIA

Poradenské a servisné nástroje pre vlastníkov lesov

### Kľúčové SLOVÁ

forestry wood chain  
optimization  
production processes

### DIGITALNE RIEŠENIE

áno

### INOVÁCIE

Áno

### KRAJINA PôVODU

Slovinsko

### ROZSAH APLIKÁCIE

Continental

### ZAČIATOK A KONIEC ROKA
