

"ID:WOOD Clustering knowledge, Innovation and Design in the SEE WOOD sector"

IDWOOD aims to promote and foster innovation and competitiveness of SMEs in the wood sector in the SEE area by sharing and transferring technical and organizational know-how to enable local support organizations to address structural deficits of SMEs and enhance innovation potentials.

Inclusion of both, stakeholders and policy makers, is of great importance and beneficial for both. Stakeholders are given the opportunity to strengthen their organizational and technical capacities, to develop new functions, to participate to working groups and to be actively involved in networking activities. Policy makers receive guidelines and advice on support policies to foster sector's development.

Results of the project are improved capacities of support organisations; transnational cooperation between support organisations, knowledge poles and productive sector; increased information flow towards SMEs; innovation, design and knowledge transferred to SMEs; sustainability of the transnational network/support system and SMEs cooperation after project end; increased knowledge of market opportunities.
