

# Public data of forests

*Public data of forest in the form of application, contains overview of data about state and privately owned forests.*

Croatian Forests Ltd is national company which manage public forests and forest land in Croatia. The company developed application which contains vector data for all 16 forest administrations of Croatian Forests. Also, the application contains information about private forests which have approved management program.

Application in cartographic form presents information in textual and tabular views, as well as spatial illustration of tree species in specific forest or area. Also, application shows two parameters for every tree specie: the total volume of timber and annual growth. Vector data about borders of management areas (forest administrations, forests units, economic units, etc.) for state and private forests are shown in the form of Google Maps basis.

Except basic information on forest administrations and units, commission minutes and improvements of the management basis for economic unit and recapitulations of forms showing wood mass and increments of tree species, are available.

Application is an innovative solution which provides an overview and information about state and private forests in one place.

Innovative solution is free for public use and available online.
