

RED FAITH as a tool of digital forestry and development of forests

RED FAITH

RED FAITH - Restoring Ecological Diversity of Forests with Airborne Imaging Technologies. Digital forestry: precision technology and knowledge for the development of forest aiming reduction of invasive species and analyzation of the surface. Due to the project the data collection was created with drones and based on the remote sensing datas the forest could be developed thus the forestry could be a service of the sustainability.

The project set the overall objective of contributing to preservation and protection of biodiversity in forest areas by supporting forestries and other organizations responsible for managing habitats in detailed, up-to-date monitoring with airborne imaging. As specific objectives it accelerates reactions to emerging hazards, protects/restores natural assets by enabling forestries to select most efficient interventions, improves knowledge of forest engineers, raise awareness on forest values and sets up cross border cooperation of forestries.

VEČ PODROBNOSTI

IZZIV

1. Izboljšava odpornosti gozdov in prilagoditev na klimatske spremembe

KLJUČNE BESEDE

Restoring Diversity Airborne Imaging

IZVORNA DRŽAVA

Hrvaška

DOMENA

Gojenje gozdov, gospodarjenje z gozdovi, odpornost, ekosistemske storitve

DIGITALNE REŠITVE

Da

OBSEG UPORABE

Čezmejni / Transnacionalni

TIP REŠITVE

Podatkovna platforma, vozlišča podatkov, odprti podatki

INOVACIJA

Ne

ZAČETNO IN KONČNO LETO

2017 - 2019

KONTAKTN PODATKI

LASTNIK OZ. AVTOR

Government of Baranya County

Yvette Szabados
