

# Assessment of Costs in Harvesting Systems using an Web-based Tool (WoodChainManager)

## WCM

*WoodChainManager, developed by the Slovenian Forestry Institute, is a web-based tool for estimating wood supply chain costs. It offers three user modules for assessing material costs of individual machines and total costs. This tool helps optimize harvesting systems by allowing users to test the impact of different technologies on total material costs. The simple matrix-based method visualizes the entire harvesting process, providing accurate cost calculations. WoodChainManager aims to increase awareness of cost management and enable direct comparison of various harvesting systems.*

For more information see FOREST4EU factsheet

## MER INFORMATION

---

### UTMANING SOM ADRESSERAS

5. Förbättra ekonomisk och miljömässig prestanda för skogsförsörjningskedjor

### NYCKELORD

Calculations

harvesting system

web-tool and optimization

wood mobilization

### UPPHOVSLAND

Slovenien

### DOMÄN

Avverkning, infrastruktur, logistik

Finansiering, offentligt finansiellt stöd

### DIGITAL LÖSNING

Ja

### POTENTIAL

Nationell

### TYPE AV LÖSNING

Rådgivning og serviceverktyg för skogsägare

### INNOVASION

Ja

### START OCH SLUTÅR

--

## KONTAKT INFORMATION

---

### ÄGARE ELLER FÖRFATTARE
