Forestry Test Enterprise Network in Switzerland (TBN)

Comparison of operating results of forestry operation in Switzerland. The network undertakes regular monitoring of many forest enterprises (ca. 30%) and elevates their market situation and a big set of economic data on a yearly basis. With these data, best practices guidance on competitive forest enterprises are elaborated and benchmarking approaches are outlined

The structural conditions are the main cause for the economic success. Unclear strategic positioning and operational deficiency are key factors for the resulting negative operating results in average, besides the high labor costs and small structured forestry operation

The TBN describes many economic, financial and structural indicators for 28% of the forest surface in Switzerland as a reference for benchmarks. Data and evaluations are available for the years 2008 – 2010, 2011 - 2013 and 2014 – 2018 of the participating forestry operation. Important factors and their influence on the operation results can be determined. Appropriate solutions for different situations and context can be found more easily

DETALJER

VEDENS URSPRUNG
Skog

TRäTYP
Rundvirke

TYP AV TRä
Stemwood

PåVERKAN På MILJö & BIOLOGISK MåNGFALD
Positive mainly for sun-hungry species

EKONOMISK EFFEKT
Positive

KOMMERSIELL POTENTIAL
--

NAV
--

EKONOMISK PåVERKAN
- 10€/ha

SPECIFIKA KUNSKAPSBEHOV
Data processing skills

MOBILISERINGSPOTENTIAL
0.1 - 0.2 m³/ha (0.35 mio. ha analyzed in through the network)

HåLLBARHETS POTENTIAL - VäRDE
