Open Houses Slovenia (OHS)

OHS is part of the international network Open House Worldwide, which operates in more than 35 cities around the world. The OHS is available to the general public, who can enter and test the buildings, get in contacts with the owners and the experts. At the same time it is also intended to promote top experts working in the field of design, design, procurement, construction, operation, maintenance and use of buildings.

Making good architecture is by no means easy. Nowadays it is challenging also in terms of the speed of orders and the advancement of technology. Good architecture is not fashionable, it is one that will be good regardless of the changes brought about by time. In this, the user will feel good, respectful to the environment and sustaining throughout the life cycle.

All the buildings showcased during OHS festivals are presented in the largest network of Slovene architecture. Over the years the largest and constantly expanding collection of contemporary Slovene architecture has been built. In the collection there are over 160 objects where wood has been used as a prevailing material for construction or indoor equipment. OHS encourages the awareness that buildings are made for long periods, therefore their operation, energy consumption and the right choice of materials are important for a sustainable and conscious social and economic development.
