

## Information sheets LWF (Example: Supply of wood chips)

The information sheets of the LWF summarize the latest research findings for practical application. They are of interest for foresters, forest workers, forest owners and interested private persons.

The information sheets of the LWF contributes to a better forest culture and professionalization even in small scale forest ownership structure and is printed and published also in Internet.

Approach in the selected example:

Description of the different options to form a processing chain for the supply of wood chips (harvesting, logging/stocking, chopping, transport), with regard to the kind and the amount of wood available

Instruction for measuring the amount of wood chips based on the estimation of the stock volume

Sustainability: Recommendation to use branches and tree tops for wood chips only dependent of the location à should not be used in locations poor of nutrients. The withdrawal of nutrients can be decreased by debranching and removal of the tree tops à nutrients stay in the ecosystem and growth is maintained. Additionally, the quality of the wood chips increases and revenues can be higher

## DETALJER

---

### VEDENS URSPRUNG

--

### TRÄTYP

--

### TYP AV TRÄ

Above ground biomass

### PÅVERKAN PÅ MILJÖ & BIOLOGISK MÅNGFALD

Advice to select methods according to the respective location

### EKONOMISK EFFEKT

Positive / more efficient working processes / cost reduction possibility  
identification

### KOMMERSIELL POTENTIAL

--
